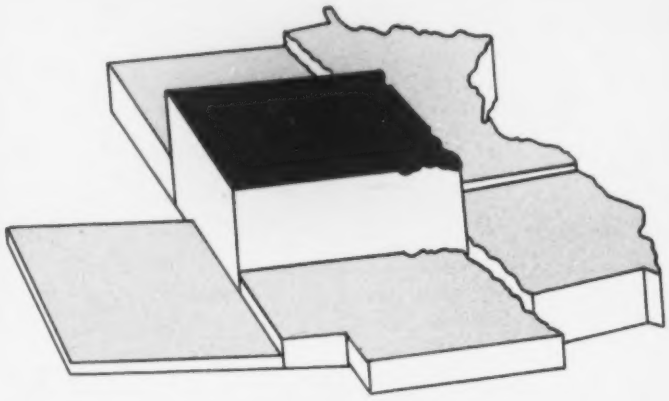
SOUTH DAKOTA Data Supplement

September 1988
Vol. V, No. 4



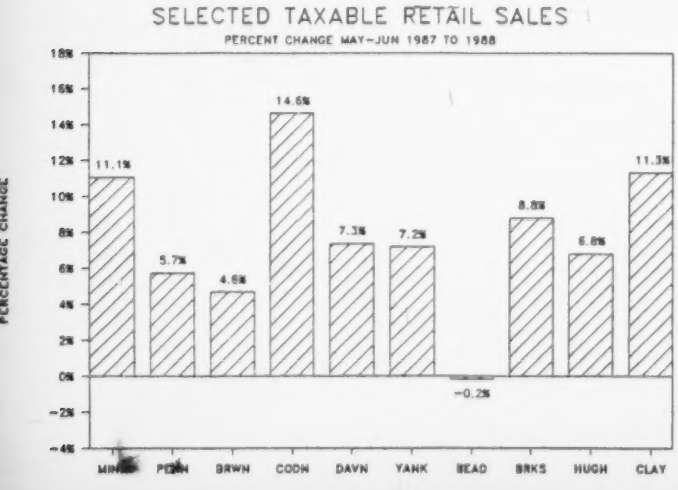
Published by Business Research Bureau, The University of South Dakota

* SOUTH DAKOTA RETAIL SALES INCREASE 7.5% IN MAY-JUNE BIMONTHLY
* RETAIL SALES IN COUNTIES OF THE TOP TEN CITIES GAIN STRENGTH
* SALES IN THE MORE RURAL COUNTIES UP 5.7%

By Randall Stuefen

The state's retail sales increase this bimonthly duplicates the 7.5% increase recorded last bimonthly. The 7.5% growth rate of the past two bimonthlies exceeds the 5.8% and 6.0% national growth rates in the same periods. The state's performance has exceeded the national retail sales growth rate in four of the past six bimonthlies.

The effects of drought do not show up in the May-June sales. Next reporting period will provide the first indication of the farmers' response to the adverse climatic conditions, good prices for stored grain, stabilizing land prices and the government relief programs. The cumulative impact of all the market forces affecting the farmer and his buying decisions is not clear. Sales performance has weakened in the rural counties over the past three bimonthly reporting periods. However, the performance remains respectable with the 5.7% increase of this bimonthly very near the national growth rate of 6.0%.



The performance difference between the urban and rural counties this reporting period is in the sale of goods. The increase in the sale of merchandise is 5.9% for the urban counties and 2.0% for the others. The sale of services for both groups is nearly the same—10% for the urban counties and 9.5% for the rural counties.

In the top ten counties, the sale of building materials is up 7.7%. General merchandise sales (department store sales) are up 21.1%. Apparel and accessories increased 6.6% from a year earlier. Furniture sales increased 17.9%. Grocery store sales are down −5.6%. Stores classified as selling miscellaneous shopping goods (specialty shops) have decreased sales of −6.2%. The hotel and motel services for the top ten are up 14.1%. The first six months of 1988 were good to this industry showing double digit growth throughout. We will monitor this group to see if the impact from the Black Hills fire is conspicuous. Continued on page 8.

BIMONTHLY PERIODS	JUL-AUG 1987	SEP-OCT 1987	NOV-DEC 1987	JAN-FEB 1988	MAR-APR 1988	MAY-JUN 1988

TRENDS IN THE SOUTH DAKOTA ECONOMY

By Trent Stowater

The following two graphs show the State of South Dakota being compared to the U.S. The data that is being shown is gross national product (GNP) of the U.S. and gross state product (GSP) for South Dakota measured in 1982 dollars. The first graph shows the per capita output for both the U.S. and South Dakota. Examination of Figure 1 indicates that South Dakota generally has the same pattern as the U.S. with a lag. South Dakota has been growing at a faster rate than the U.S. over this time period. Even though South Dakota is growing at a faster rate, the U.S. still has a higher per capita output than South Dakota.

The second graph shows the percentage change in output for both the U.S. and South Dakota. South Dakota has larger swings in the percentage changes than the U.S. For the most part, South Dakota is in the same percentage change range but not always following the same pattern as the U.S.

The last two graphs show farm output and manufacturing output as a percent of the total. Farm output starts out around 20% of the total output. It stayed at this level until 1975, with a high being in 1973 of close to 22%. After 1975 the percent took a sharp drop; this was the drought year of 1976. The manufacturing graph indicates that manufacturing as a share of total output has been steadily increasing. Currently, manufacturing makes up 11% of the total output in South Dakota.
